You're trapped in a deadly Asteroid belt. Surrounded by more rock than a heavy metal roadie. Armed with powerful photon cannons you must blast your way to freedom.

Beware alien spacecraft with lasers more dangerous than a kiss from your granny. They're out to mash your ship into metal mincemeat. Use your rocket thrusters wisely and when the heat's really on hit "hyperwarp" and watch them wallow in your wake.

Challenge the computer on your own or with an ally. Alternatively, challenge a friend and blow them into the next galaxy.

'Asteroids,'" the game that made them barricade the arcade, is now on Game Boy.\* With digital sound and graphics so good they'll send your eyeballs into orbit. It's the game that's tougher than a ten year old rock cake.

You are the Supreme Defence minister and doom is on your doorstep. Thousands of not so cuddly scully missiles are falling from the sky. As the boys bite their nails in the bunkers, the real men man the missile bases. Your job, blast the enemy's bombardment out of the blue.

Defend one attack and another starts, these boys fire more missiles than a Trafalgar Square pigeon. They've got satellites, stealth bombers and very clever smart bombs.

Defend 16 cities from New York to Moscow. Make a slip of the thumb and the east gets blown west.

'Missile Command'" is the arcade classic now available on Game Boy, with digital sound and graphics areal they'll blast your head off. It's the game for people who carry sandbags not handbags.

ISSUE!

#### EDITORIAL

Yet more excitement from Jazza Rignali as he unwells more exciting comments, amazing insults and bizarre UFO slightings. If you feel you can add something to these entertaining pages, just send it in! Even if we don't print it, it might still give us a laugh. But then, maybe we'll just throw it in the bin. We're funny like that, you see.

#### NEWS

MEAN MACHINES strikes gold yet again with the complete lowdown of exciting consoles-related events and announcements. As we like to say, if it's important it's here, and if it isn't, it's probably restricted information that we don't want to tell you.

#### **MEAN YOB**

Gince again, the MEAN YOB has compiled an entertaining section full of deep, incisi-re opinions and probing comment. Actually the chances are that the letters this month are sad to the extreme and the YOB's special insult-related talents are tested to the max!

#### Q+A

We receive many hundreds of letters per month, packed with amazing, exciting questions for the man known as Julian Rignall. This three-page extravaganza shows the cream of the crop which is really saying something, we can tell you!

MEAN MACHINES stays at the top again with eleven packed pages of tip-related tomfootery! Look out for mega tips specials on Raman for the Super NES and a complete solution to Shadow of the Beast on the Sega Master System. Add the usual assortment of amazing little tips and cheats and you have a humper specializer of some note.

#### CHARTS

Ooh ooh! Drama! Nintendo actually sent us two charts this month, so we actually had to write this section twice! That meant that the charts took a record six minutes to write this month. Now there's a thing.

#### THE HOTLINES

MEAN MACHINES spares no expense in bringing the latest console technology to its readers through a series of simple 'phone-in competitions. Join in the fun and get dialling - NOW!

Have you ever wanted to get your greasy mitts on some cut-price console gear? Fancy letting MEAN MACHINES readers know about some important event? Do you want to start a long term literary relationship with someone? Well, check out the Megamart. It's all this and lots, lots more (so we're told).

#### PREVIEWS

So, you want to know about all the latest console releases before anyone else, eh? Well, check out the MEAN MACHINES previews section - the most informative, up-to-date lowdown on the latest games!

#### NEXT MONTH

MEAN MACHINES is so quick and up-to-date with everything in the consoles world that telling you what is going to be in next month's issue is impossible. So, instead, what we have here is a nice piece of artwork and some rubbish text.

I haven't got a lot to say this month, mainly because the office is boiling hot (we're in the middle of a heatwave) and can't be bothered to think of anything. Oh, except that we've got some unbelievable free gifts lined up for the Summer - and something very special happening soon. There'll be further

announcements next month, so keer, watching this space!

More supernatural malarkey as we print two pictures that irrefutably prove the existence of ghosts. First is the creepy apparition that appeared in the chair of MEGATECH Deputy Editor Mark Patterson. We've heard of ghost writers, but this is ridiculous! And then there's the truly frightening picture sent in by Ranjit Doroszkiewicz (eh?) from Manchester of a ghastly apparition playing on a ghostly Gameboy. O-BOA 04/, ITATLE OF COMMENT OF C

Super NES owners spoiling for some one-on-one fisticuffs will no doubt soil their underwear with excitement when they hear about Battle Blaze.

This Swords and Sorcery style beat 'em up casts you as a barbarian out to rid the land of a series of horrific overlords. One player can face the might of the overlords, or perhaps face up to a mate in a two-player bout to the death!

In short, Battle Blaze is a sad, laughable excuse for a beat 'em up, with pathetic graphics and sound. There are only three attack moves as well, making Battle Blaze grow very dull very quickly. So, avoid it at all costs.

#### CONSOLE CARRY CASES

Valby, the carry case merchants, have released some more products which should appeal to anyone who projects carrying their consoles, or their carrs about. Look out for the Megadrive attache case. This fine tem, retailing at £49.99, enables you to carry your Megadrive and some games about. With a bit of structural alteration\*, it's also possible to fit in your ower supply as well. Hurnal'

Super Extendo Cables (as they are known) are also available that enable you to extend the length o your joypad cables. Nuby have yet to announce a price for this invaluable piece of kit.

Also available are numerous accessories for the Gameboy, including carry cases, lights, holsters (!) and magnifiers!

## SEGA LOCK-OUT CHIP SHOCK

ega Europe have announced that forthcoming egadrive titles are to include a security chip that akes it impossible to run import titles on a British achine, or official games on a Japanese model. Th st game to be protected in this way is Artyon

fficial UK Super NES system, and a converter has een developed to neutralise the protection. Interprising importers will probably find a way around te new Sega protection too. We'll keep you posted.

## SUPER SCOPE BUNDLE PACKAGE

ncorporating the smash hit 16-bit machine along with he best Light Phaser available for a console - the lintendo Super Scope. The price for this bundle is a sargain £169.99, as opposed to £149.99 for the tand-alone console.

If you fancy the looks of the Super Scope, checi out page 96 for a definitive review of both the hardware and the bundled software.

## **ALESTE ACTION!**

Super NES owning scrolling shoot 'em up fans are likely to wet their pants in frenzied excitement when they play Super Aleste, available now as a Japanese import.

This vertically scrolling blaster is very reminiscent of Gunhed on the PC Engine, in that it's packed to the brim with baddies to kill with some of the greatest power-up weaponry yet seen on a console game!

Interested? You should be! MEAN MACHINES will be giving this game the once over in a future issue. In the meanwhile, feast your eyes on these screenshots!

# SUPER NES IMPORT ROUND-UP

Five new Super NES import titles have found their way to the MEAN MACHINES office. Musya is a platform game with slash em up overtones which boasts average graphics along with mediore gameplay. World Champion Super Boxing is as at attempt at a boxing sim that should be avoided at all closts. The Official Super Famion F1 Grand Pink is a barrely average overhead scrolling race game which is guide a folk lief F1 Circus (but not as much full super Cup Soccer and Halt Fink Hero are two doubtal simulations that are simply not worth.

So, all in all, a rather sad month for imports with only Super Aleste (see the news story within these pages) worth considering.

## **DESERT STRIKE WILL FLY**

## YOU TO THE HEART OF THE ACTION

#### BEFORE YOU CAN SAY "SCHWARZKOPF".

One of the Middle East's craziest dictators has finally achieved nuclear capability and is threatening to zap anyone who stands in the way of his mad ambitions.

Without warning, the Madman invades a small, but very rich neighbouring Arab state and the U.S President assigns to you the 'covert' mission of piloting an Apache helicopter to neutralise his offensive capability.

In "Desert Strike" you'll need all the lightning reactions to cope with white hot action, plus the intelligence to plot a successful attack strategy.

You'll be in complete control of the action from a unique 3/4 top down perspective, flying 27 different missions including, rescuing POWs and 'human shields', defending oil fields and taking out SCUD missile launchers and nuclear reactor plants.

To help you negotiate the alien landscape and calculate the location of enemy armies and weaponry, you have an on-board battle map with satellite-generated data.

If you defeat and destroy the Madman's plans, the U.S. Government will want to reward you.

And who knows, you too may even get an honorary knighthood and a hero's nickname!

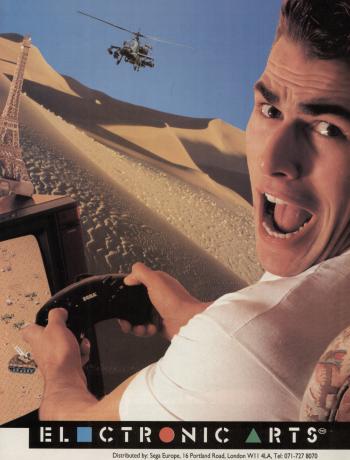

"A brilliant, original Mega Drive game that will keep blasting fans entertained for weeks" 94% & Mega Game Award - Mean Machines

"One of the cleverest and most playable Mega Drive blasts to date..... An absolute must" 93% & Hyper Award - Megatech.

# NEWS

# THE MAGIC IS BACK... ON THE SUPER NES!

Ocean Software are getting well into the swing of their console development and are currently putting the finishing touches to one of their hottest movie licenses - Lethal Weapon!

The game allows players to take control of either Martin Riggs or Roger Mutrauly, each with their own special strengths and weaknesses which you must master in order to conquer the game. This game looks like being a really impressive platform shoot 'em up, with cute sprites (that bear little resemblance to the movie stars because of licensing difficulties) and non-stop action.

Released for the Super NES only, this looks like being a game to watch out for. Look out for more details and screenshots soon.

# STAY OUT OF TROUBLE!

Keep your eyes peeled for Robocop III on the Super NES. This fast, super-amonds arcade-style platform game bears quite astrong resemblance to the Data East Robocop coin-op. However, if features all-new stages based on the fortncoming movie, including a vertically scrolling shoot 'em up section where Robo takes to the skies with his jet-pack and blows allorem foes into oblivon. As you can see from the screenshots, Robocop III is looking 'right tasty' as we like to say, Stay with MEAN MACHINES for the latest details.

## GAMESMASTER RETURNS!

Gamesmaster, the cult TV games programme, is reappearing on our screens in the autumn following the runaway success of its premiere series on Channel Four. The show, with its average viewing figures of

around 3 million, is to run for 26 episodes with the possibility of a fab one hour special around Christmas time. Once again, Dominik Diamond and Patrick Moore are presenting the series.

Gamesmaster is being filmed as we speak and the

Gamesmaster is being limbo as we speak and the producers are anxious to get hold of people of all ages to appear as contestants, reviewers and to enter Gamesmaster's "Consoletation Zone".

To apply for your five minutes of TV stardom write off to GAMESMASTER STARDOM, PO Box 91, London, E14 9GT. You need to include details of your favourite games (and maybe highscores), background details (age, phone number and address) and a recent photograph.

Anyone wanting tickets to watch one of Gamesmaster's live challenges should write to the same address asking for details.

#### MISTAK KORNER MFAN MACHINES 14

In last month's Megadrive versus Super NES article, we stated that Super NES game would be retailing at £45.00 and upwards. Happily, we can reveal that at the eleventh hour, Nintendo changed their minds, and that the cheapers Super NES titles now sell at 29.99 bringing them well into line with Megadrive titles.

between you and the boy Senna, there is a world championship to be won. You compete against fifteen other drivers across sixteen gruelling courses - each based on a real-life circuit. As in a proper GP, points are awarded according to your finishing position in each race. At the end of the season he with the most points wins. This stops you being eliminated from the competition every time you lose a race, although you may find yourself consistently at the bottom of the table

Super Monaco GP still ranks as one of the hest racers on the Megadrive, and great things were expected from the sequel. The main body

First impressions are promising. The range of options is more impressive than the Megadrive version, and although the idea of constructing like car is nothing new, it's still a useful option, as is senar's advice corner. Once I started racing though it was a different story. The speedometer might claim the car is doing 300 kph, but I found myself expecting the vicer to come wheeling past or sizefully the whole concern of speed

his bicycle. Basically, the whole concept of speed is unrealistic. Some of the blame for this can be directed at the graphics which, while not disastrous, do little to enhance the Formula One atmosphere. The music and sound effects contribute nothing to the Grand Prix experience either - the engine sounds like psychotic hair-dryer! Super Monaco GP II is a big disappointment and isn't a game I can recommend at all - even to the most inept of drivers.

Dear YOB

# WRITES...

Dear YOB

Last month you made a big mistake related to the Wondermega. You said that the picture was an artist's impression. If someone drew that I'll smack myself around the face ten times with a large haddock.

Why did you bring out that book with reviews from issues 1-5 in it? Most people have already got these issues and therefore won't buy it, doh!

YOB, you are so thick that you

went past Texas DIY store and thought you were in Americal James O'Connel, Horley, Surrey YOB: You'd better start smacking yourself in the face with a large haddock, because it WAS an artist's impression - it was drawn up on a computer. Doh! MEAN MACHINES issue 1 sold around 28,000 copies. By issue 5 we were selling around

The spaceship had come from afar. Many millions of years had it travelled, its inhabitants contained in cryogenic chambers. When they awoke, only three had survived, but they nevertheless prepared themselves as they neared their destination

- Earth. When they landed, the three walked out of the craft and instantly melted. For they were Snowmen from the planet Fre-eze and it was ruddy hot. Meanwhile across town YOB was answering letters as he normally does at this time of month. If you've got anything of interest to say, write to: I'M A PHEASANT PLUCKER FOR I PLUCK FINE PHEASANTS MAILBAG. MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

50,000 copies. These days we sell around 110,000 copies per issue - that means (because you're obviously too stupid to work it out for yourself) that there are now 60,000 MEAN MACHINES readers who never saw any of those issues. James O'Connel, you are so thick if you found a dog turd on the floor you'd eat it because you'd

think it was a Mars bar.

#### MORE DRIVEL

Dear YOB

Firstly we think your magazine is excellent, keep up the good work. But now onto a serious matter, recently while working in our lab, we came up with a great invention, the Super Drive Convertor, this

ingenious device allows you to play SNES games on your Megadrive and we are now working on a similar device that allows you to play Megadrive games on your SNES. We think they will sell brilliantly and we will send you one as soon as we come up with the finished product.

On our recent visit to the very chilly but scenic south pole, we came across a pair of stinking, steaming, sweaty undies (maybe they are yours?) in which we discovered a 64-Bit handheld made by the leading company Cinos (!?). It came with a vast variety of games which included

Huddersfield YOR: It's definitely one of those

months, isn't it. All I've had so far is letters from idiots, imbeciles, morons and twerps, and now we've sunk even lower with this mindless drivel. Have people lost the art of decent letterwriting? Has anyone got anything interesting to say?

#### ON THE ROCKS ALREADY!

Dear YOB

The trouble is that my girlfriend thinks this money should go towards our future life together and threatens to leave me if I buy one. I am staining my pants with worry, is it lonely days with my SNES or married bliss?

Paul Colgate, Staines, Middx YOB: Hmmm. Well, if your girlfriend is that tight, leave her.

#### A QUICK **ONE-TWO**

Dear Meanest YOB I don't know why I'm writing to you but I just want to make a few points clear.

1. Last month I had the misfortune to read Total, the Nintendo mag. When I read an article which stated that Sonic might be coming out on the SNES. Surely they're wrong.

2. I have a dumb friend called Grant who believes that the IBM PC has better graphics than the Megadrive. Is this true or is he as stupid as a mental baboon? Peter Hersee, Rugby YOB: Yes times two.

#### WOW! SOMEONE INTELLIGENT!

Dear YOB

I'm tired of turning your fab pages every month and reading one or two letters from complete idiots. Why on earth do people say that MEAN MACHINES prefer Nintendo games and give them good reviews, don't they know that you gauge NES games by other NES games. If one NES game is given a favourable review it's because it's better than most NES

games, didn't anyone see the 9% Road Fighter review? And why oh why do people keep comparing consoles and computers can't they just buy the one they prefer? I think you should insult people for being complete pillocks and for being stupid enough to insult you, why bother insulting someone who can answer your questions? Just to finish off, Why don't you give away a SNES for the star letter? I wouldn't complain.

Justin Jeffries, Streatham, London YOB: What you say is true. And I do insult people who are complete pillocks, and those who aren't, such as yourself, remain unscathed. Should someone send in the best letter of the month and want a Super NES instead of £150.00 worth of

happy to send them one.

LEICESTER: Get a job you lazy

PETER BORG, CLAPHAM: You can't draw and you can't write What kind of remedial are you?

ANDREW GALVIN: Don't then

#### SEE AN OLD GX4000...

Dear Jazza Please could you answer a few questions with your extreme intellect:

1. I have seen a picture of a device called a Gamebov plus which you attatch to your Gameboy and it enables you to use six fire buttons. I am eager to know when it will be released

2. How much will it cost? 3. I have also seen a picture of

Streetfighter 2 on the Gameboy machine? and would like to know when it will

JAZ: 1. Possibly in the future we'll let you know when we have more information. 2. Well, EA, you've heard the man - get on with it! 3. It would make an ideal conversion, but at the moment there are no plans to release it.

#### IT'S YOUR **FAVOURITE** CONSOLE

Dear Jaz

With the likes of Populous, Sim City and soon, Powermonger on console, will we ever see games like Mega-lo-mania or Space Crusade converted from

computer? Also, will there be an add-on for the SNES that will allow you to play NES games? Rob Collier, Leominster, Herefordshire

JAZ: Mega-lo-mania might possibly appear, and Innovation are working on a NES/SNES adaptor as we speak.

4. Some of the kids at our school reckon that Gameboys are crud because they are not in colour, please put them straight about this brill machine. Ian Herries, Felixtowe, Suffolk JAZ: 1, 2 and 3, That's CVG's April fool you're talking about Suckaaaaaaah! 4. Have those idiots actually played them?

#### THAT'S YOURS, THAT IS

Dear Jazza

with regards to the SNES, I have a few questions which are puzzling

 Will there ever be a keyboard and/or disk drive for the SNES? I ask this because the machine has great potential in the graphics and sound departments.

2. If Electronic Arts do not start naking excellent games for the SNES then I will go mad because they are definitely the best programming team around. So please Electronic Arts, start

making SNES games and make this SNES owner a happier one. 3. Finally, will my favourite arcade blast, Metal Hawk, be

released on this wonderful C Wilson, Tunbridge Wells, Kent

#### SEE ROAD FIGHTER...

Please answer these questions as it is essential that I know them: 1. It mentions at the end of Turrican 2 that Super Turrican is

going to be released on the SNES. is this true? 2. In ACE, the computer

azine, it says that Mario 5 is going to be packed full of all the previous Mario games, all of this med into a SNES cartridge. ACE have been known to lie, so could you set the record straight?

3. WWF looks and sounds fantastic, but all the other games like Gameboy WWF and Wrestling Challenge have been easy to complete. Wrestlefest is even worse, I completed Royal Rumble on my second go, so is Super WWF easy to complete?

4. Just one more thing, tell my Mother and Father to get me a YOU WROTE

#### I DON'T CARE...

Please answer my questions, they

are really important to me. 1. Once upon a time I was playing on John Madden '92. I chose a play action and passed it to the quarterback, he mysteriously shrunk to 1/4 of his normal size and turned into the referee( I know it sounds crazy but it's true). Please explain what

2. I'm selling my Megadrive and getting a SNES in a few days. Do you know if It Came From The Desert or Ant Heads are coming out for it? And if so, when?

# RESCUE RANGER

Pete Greathead from County Durham has sent in this extremely devious set of tips that should help you defeat the first few end-of-level bosses in this excellent platform romp.

### **CLEANING MACHINE BOSS**

Run for the red ball and pick it up and scarper over to the right hand-side of the screen. When the lightning appears, jump over it and run to the middle of the screen and shoot the red ball up to the green ball on the machine. The machine will flash. Dodge the falling ball and run to the right of the screen. Now just repeat the process.

Get the red ball, collect it and dodge the owl's feathers. Wait until he comes back down and then throw the ball at him. Dodge the ball as it falls, collect it and repeat the process.

propelled towards you and collect the ball. When the UFO is above you, press UP and B to hit it. Continue this plan of action to defeat this extra terrestrial nasty.

### THE BONUS GAME

The best way to deal with this game is to start getting the boxes from the left side of the screen. That makes it possible to get the extra life from the top box.

Here are a number of useful hints for this good arcade adventure game based on the funniest TV show

around at the moment. 1. Stand outside the cinema until the timer reads 400. A kid should come out wearing purple. Spray him. 2. Use the 'phone and Moe from Moe's Tavern

should chase you. Again, spray him. 3. Buy the whistle and when you get to the end of

the retirement home, use it and Grandpa Simpson should give some cash. 4. On level two, when you get to the floating

platforms, jump on to the second one three times. It will carry you across the level. On your way down jump diagonally right to receive invincibility!

5. On level three, use the magnet from level one on the wheel of fortune and you'll automatically win.

6. When you get to the big Krusty the Klown face. jump up into his mouth and you are teleported to a long corridor packed with coins. Yeah!

a very strange tip, sent into the MEAN MACHINES office by Richard Lee from Ascot

After completing the game, press the A button to return to the title screen. Now press UP, UP. DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT, B. A and START. You'll begin the game with 28 Magic Wings. Cool!

1. On the continue screen, go to the extreme left, passing the continue door where four lives are yours for the taking. 2. Wait until the game enters

**DEMO MODE and wait for Gomez** to pick up a power-up. Start the game at this point and you will begin carrying the same power-up! Hurrah!

3. For anyone who's dying to see the last level, just enter BLS1T as the password. As an added bonus, you'll get five energy hearts to help you out

4. This code (from Andrew Guy, who hails from Stonnal) is especially useful. Type IIII (if that doesn't work try 1111) for 100 lives!

# Thanks to Mr Unknown, you too

can sample a different intro to the sad shambles that is Super EDF Just turn the machine off and hold down UP and START when you power-up your Super NES

Also, to become invincible (which isn't really required ridiculously simple) pause the game and press A, B, X, Y, L, R, UP, DOWN, LEFT and RIGHT.

Unpause the game and you should be indestructible

This game has prompted a couple of games players to send in their stuff. First of all, Marc J Gilbert from Newark reckons that you should hold down SELECT during play to slow the action down. This especially comes in handy during the reprogramming levels. Here are some excellent tips to help you get

through the first four levels of Acclaim's cool game, supplied by Paul Moore from Danbury Common in Essex.

### LEVEL ONE Shoot the beacons in this order: fourth, first, fifth,

second, third. LEVEL TWO

### At the end of this level, jump onto the middle platform Stand in front of the door and press UP.

LEVEL THREE This is simple. Just re-program all of the readouts to

If you're a Super NES owner into a little bit of beat 'em up action, you could do a lot worse than check out Ranma Nibunnoighi 1/2 - a one-on-one combat game that could be described as a sort of cut-down version of Street Fighter II with its own inimitable graphic style. These tips were sent in by Mike Moore from Hull and they should help out anyone who fancies mastering each character, Read on...

Sometimes a simple attack amidst many more complex moves pays off.

Ranma's Dad! Although he is getting on a bit, he still range weapons. Practise his elbow charge. MAGICAL ATTACK: Fireball. SPECIAL ATTACK: Elbow charge.

MAGIC ATTACK: Spin punch. SPECIAL ATTACK: Laser beam **RANGE ATTACK: None** 

MAGIC ATTACK: Spin punch.

SPECIAL ATTACK: Laser beam

He's also known as the Man with the Stick - for obvious reasons. He is a good characters for beginners to start with, but any character with a double jump can get in close and dust his monkey ass (preferably by throwing him). He cannot throw as he uses both hands using his stick MAGIC ATTACK: Ground lightning.

SPECIAL ATTACK: Mini-earthquake. RANGE ATTACK: Mini-earthquake.

# **KOHCHOH**

With his skateboard and loud shirt, this radical dude is a deadly opponent. Once you've mastered his many different forms of offense, you will be difficult to defeat. His only real weakness is his slow speed. The best tactic is to use flying kicks against him. MAGIC ATTACK: Coconut bombs. SPECIAL ATTACK: None. RANGE ATTACKS: Flying lobsters, bombs.

# TIPS

# NOICHI

# KODACHI

Learn to master and exploit Ranma's amazing jumping powers.

The lectarded wonder is very fast, with many tricks up her lectard to watch out for. Her range attacks are unparalled, but she is pretty simple to defeat in close quarters. Press PUNCH and UP to make use of the best range attack in the whole game.

MAGIC ATTACK: Jump spin.

MAGIC ATTACK: Jump spin. SPECIAL ATTACK: Killer rose RANGE ATTACKS: Bouncing ball, ribbon laser, stick.

The bitter taste of defeat as Genma defeats the male version of Ranma. Genma rubs salt in the wound by changing into a panda (?).

# ROYHGA

ne ast opportent in the one-player game is pernag the deadliest. His power punches are almost twice a ffective as any other character's and his fireball owers are second to none. Pressing PUNCH very unckly unleashes a deadly explosive punch. Very npressive.

impressive.
MAGIC ATTACK: Fireball.
SPECIAL ATTACK: Ground shaker
RANGE ATTACKS: Fireball.

# **SHAMPOO**

She may look helpless, but she can kick the excrement out of laryone given half a chance. She has an evil double jump kick just like Ramma's, which is useful for jumping in, attacking and then retreating quickly. She is fast and deadly, but has no range wapon. Exploit this as the wakeness thall it is. MAGIC ATTACK: Spin punch. SPECIAL ATTACK: Running charge.

RANGE ATTACKS: None.

# TEN USEFUL HINTS

These ten useful hints should improve your Ranma combat style immensely. Check them out...

 For two-player games, try each character out to see which suits your playing style. Always have a second choice in case your mate pinches your favourite player.

Throwing your opponent whenever possible is a good tip. This is the most powerful type of move.
 Don't just rely on long range weapons or attacks.

as any half decent player will then be able to thrash
you.

 Use the two-player mode on your own to master each character's moves.
 Remember that if you block for too long, your

opponent can throw you, but if he gets too close, you can throw him!

6. A good defence is always instrumental in order to be victorious.

to be victorious.

7. It's sometimes possible to get new attack moves by using directions in conjuction with the attack

buttons.

8. Be careful. In one-player mode, if the computer

is losing, he will suddenly get a lot better!

9. Vary your attack manoeuvres - the last few

computer players seem to memorise any patterns you develop and then proceed to beat you to pulp should you use those tactics again.

10. If computer opponents block everything you do, block yourself and wait for him to attack. You should now be able to get in a quick blow.

One of the better releases of late for the Master System has been Shadow of the Beast by Tecmagik. Here, MEAN MACHINES offers you the exclusive full solution to this massive game courtesy of Tecmagik themselves!

## STACE ONE

At the start of the game, go left past the tree with "HOME" written on it and punch the rock pile to collect the key. Run back to the "HOME" tree and select the key to enter the underground domain.

## SHADOW OF

-----

Once inside, beware of the flame which shoots across the floor. Go right, down the ladder, left, down, right down left alow. Travel left to collect a long jump potion from the chest. Was down the ladder and jump left to get hold of a map jump left to get hold of a map jump left to get hold of a map jump left to get hold of and dop of the platform. Continue left and dop off the platform. Continue left and leap over the gate of light the guardian of the orb. Punch the blue ball he holds, avoiding the flame, until you defeat him. This gives you a plasma both punch.

### STAGE THREE

Walk right a little and drop down the agn to get the round yellow key. Co right a little and collect the energy restoring potion and fall down the gap. Fun right as far as possible, avoiding the spikes on the floor. New gou, right, up, left (agt the red potion to increase your strength), up, left, up, left and up. Walk right to confront Death Skeldon. The best tip here is just to keep zappnp him as quickly as possible.

# STAGE FOUR Guide the Beast right and then up

the first ladder, and then left until

Get the key first, then come

ou reach a lever, ignoring the adder you pass. Throw the lever ind go right and up the previously gnored ladder. Walk left and ollect the key and then travel ght, down the ladder, down, right, own.

### OTHER LINE

Run right, up the ladder and move right, watching out for the snail. Go down all the way and then travel left, jumping over the slime. Follow these directions: down, right, down, right, down, left, down, left, down, left, down, left, up, left, down, left, up, left, down, left was then up. Collect the green key to the right.

## STAGE SIX

Retrace your steps left and go back down the ladder, right a little and then down. Go right (avoiding the slime and spikes) until you reach Hydrassas the Dragon. Defeat him by punching the horn on the lower head a number of limes (trying to avoid the spitting flames). Run right and use the yellow key to enter the well.

## TAGE SEVEN

Climb up the well to reach a position just right of the starting location. Now you will have the key to the castle, so begin the journey to the right. Punch rocks to collect extra energy. Make sure you get a

torch to see what you're doing in the casile. If you take the coin to the well and select it, you will get an extra life. When you reach King Gargoyle, you are transported to the outside of the castle where you must use the square white key to enter and find a dragon's egg. This egg is used later on in the game.

### ARE RICH

Once inside the castle, run left a life, up, right, down, right and life, up, right, down, right and drop down (use the white invulnerability potion or the long-jump potion, or you die a horrific death). Go left and up and then travel all the way right to pick up a spanner. Now return all the way left, uponing the first ladder down. Walk down, right, down and Go right and fall down being careful not be impale yourself on the swords. Tavel left and then down, right, down and left to the chest marked "BASTER". Select this and you will have a weapon to use against the monters. Co right up to design the protection of the spanner to disable it, allowing you sprored to disable it, allowing you process.

# MEGADRIVE

Many years ago in prehistoric times there lived a race of giant flying reptiles, legendary for the huge eggs they laid - one of which was capable of feeding a family of Tasmanian Devils for a whole year! Legend also has it that somewhere, in a lost valley, these creatures live on. Naturally, these eggs seem very appealing to young Taz, who sets his heart on a couple. Sadly, Tasmania is not known for its specialist delicatessens and it becomes apparent to the hapless young Devil that he will have to sally forth and find the valley himself.

Unfortunately, Taz has two major problems. First of all, he doesn't have the foggiest idea where to start his search - so it's up to you to help guide him around the platform-style land of Tasmania. Secondly, everyone else in Tasmania loathes and detests Tasmanian Devils - which leads them to attack Taz with no provocation. Still, Taz has his mighty spinning and leaping abilities to depend on, as well as a healthy tendency to eat anything in his path!

### Taz encounters a problem in Iceland.

▲ Watch out Taz!

voracious appetite. Likewise, eating everything in sight plays a fundamental role in the Megadrive game. Every time Taz comes into contact with an inert object or living creature smaller than he is. Taz is prone to shove it straight down his cakehole. Naturally, this can be a good thing when it comes to replenishing energy h goodies such as roast chicken, but Taz must also ware of harmful things, such as bombs, which have indency to explode once eaten - severely draining his energy bar

The Taz family.

detailed and full of colour, a still wasn't all that appealing. True, the first couple get a bit more interesting and there is a stronger puzzle element to the game. The wide range of actions available to Taz also help sustain interest. The only lifaw with Taz Mania is that it's a mite too easy. Although some of the fifteen levels provide: real challenge, a foot of them are a little too short to fully test your gaming abilities. Taz Mania is a very good game with finatistic graphics and some really smart gameplay, but when it comes to the utilimate in Magadive platform thrills Robocod is still the one to go for.

Some options and gorgeous intros as well as superb in-game presentation.

Easily some of the best Megadrive graphics yet - superlative sprites, animation and backgrounds in glorious Technicolour.

Effects as true to the cartoons as you could

expect, as well as some suitable tunes.

There's lots to do and loads of variety. The action moves at a decent speed and it's a lot of fun to play.

Sadly, although Taz Mania is entertaining. it's too easy - even on HARD, platform fans won't find a really decent challenge.

An enjoyable and visually exciting platform game which may not be tough enough for hardened platform veterans. but is still worth a look.

Hoisting a rock above his head, Chuck is invulnerable to falling debris.

Chuck hitches a ride on a helpful brontosaurus. This comes in handy for negotiating swamps.

Rocks are a caveman's hest friend (in this game at least). Chuck Rock is capable of lifting boulders and these are used to crush any enemies that cross his path. Rocks are also useful shields to protect Chuck's head from any falling debris or enemy sprites. Boulders are also excellent for jumping on to get some extra height - this is often the only way to get your hands on some juicy bonuses.

CONVERSION CAPERS Just like Corporation (reviewed last issue), Chuck

Rock was originally an Atari ST and Amiga game released by an independent company called Core Design. For the Megadrive conversion, Core's original programming team were called in to perform the coding honours. This version is actually quite a bit faster and smoother than the original 16-bit games and has a larger scrolling screen too. Cor!

To add to that all-important humorous atmosphere, Chuck Rock has many stone age samples, all cheekily snatched from Hanna Barbera cartoons! So. ready your ears for an aural overload as you thrill to sound taken from the likes of The Flintstones and Captain Caveman!

Watch out Chuck!

# MEGADRIVE REVIEW

Belly-butting that strange green creature creates a useful platform used to reach later parts of the level. Essential.

# STONE AGE PUZZLING

There are a number of mini-puzzies incorporated into Chuck Rock to tak the old grey matter as well as your arcade reflexes. For example, at one point in the game, Chuck reaches a massive wall which seems impassable. However, there is a seesaw type arrangement waiting at the foot of the wall. By clambering onto one end and chucking a boulder onto the other. Chuck Rock is propeled into space and it's up to you to guide him to a safe leading!

Door old Chuck Rock! His missus has been mercilessly kidnapped by the evil Gary Gritter! In his quest to rescue Ophelia, his lady love, he has to follow Gritter through some of the most treacherous areas of prehistoric Earth until he faces his

arch-nemesis in the final showdown! What this generally entails is screen after scrolling screen of platform fun as Chuck uses his incredible cunning along with his massive belly-butting and rock-throwing abilities against the many stone age

Have you got what it takes to rescue Chuck Rock's wife from the clutches of evil?

The Gary Harrod lookalike struts around prehistoric Earth admiring the scenery.

Chuck Rock lurks behind some undergrowth.

## COMMENT

Okay, so the graphics aren't as good as the Megadrive version. However, Chuck. Rock is still as playable as the 15-bit version with the same

with the same great Justinois and mini-puzzle solving. The game is really challenging as well. The first couple of tevels may be quite simple to complete, but after that it's a complete, but after that or a you try large. The same should be supported by the same should be supported by

A fine leap from Chuck.

Chuck ponders a problem.

# LETHAL WEAPON

Rather strangely, Chuck Rock has something in common with the "wrestler". Big Daddy, in that he likes to repel his opponents by letting loose with his massive belly. This "belly but! (as it's known) is effective against just about any opponent in the game, although follong range combal. Chuck has to rely on his boulders for help.

# MEGADRIVE REVIEW

by the year 2028, man's war with machines is almost at an end. This grim holocoust was caused in the first place by the super defence mainframe. Skynet, an artificially intelligent system which hought the easiest way to protect the planet was to wipe out the entire human race and replace them with robots. Thus a nuclear war was initiated which killed.

Thus a nuclear war was initiated which killed billions, and machines everywhere decilared war on the survivors - even people's Megadrives and electric toothhrushes turned against them. Luckly for us humans the man John Connor was on hand to lead the human race by circly, in its actificial tempt to ensure victory. Skynet decided to send a super hand remarker knows to wide to the send a super hand remarker knows and the send of the John got wind of this insidious plot however, and sent one of his crack solders back to protect his murmy.

In this long-awaited game of the film you pley the part of Kyle Reese - hard person extraordinairs. It is your job to destroy that nasily Terminator and thereby sawe Sarah Connor from a sticky and. There are four levels of platform-based shoot 'em up thrills, each one loosely based on a scene from the movie - including the climactic showdown in an empty machine shop.

# 1 E RANDA

Level one is set in the future. Kyle infiltrates a Skynet base to destroy a big bubbling tank of gook (at least that's t looks like). before legging it to the time displac ent unit and zipping back to the future In this level, the boy Reese is armed with a supply of hand grenades, a few time bombs (for blowing open doors and destroying the final target) and, if he can find it, an Uzi sub machine gun. However, he is pitted against Hunter/Killers, huge robots of doom and any number of cannon-toting terminators!

Level two takes place in the streets of modern day Los Angeles. Kyle must find a phone an check Sarah box (so ress in the book) and Connor run to the Tech Noir nightclub in e Terminator getting time to stop th his evil clut Howeve , the police are after Kyle and he has to avoid them especially as they are only lightly stunned by five straight shotgun blasts

Kyle Reese locates Sarah Connor in the Tech Noir bar. Level three is set in a downtown police station. Kyle has been arrested, and now the Terminator has him Kule must escape d flee before planet Earth is doomed! Along the way are indestructo-c hat pesky must be shot Terminator, wh enty times before he is about t stunned enough to let Kyle escapel

More Sarah Connor-related action as Reese searches the police station, but the Terminator is close behind!

The final level is set is set after-hours in an empty factory. The Terminator has been badly damaged by a petrol tanker so t acade has been she now use his wits and ahem eme explos nator into a hydra press, thus crushing him into some sembling an ethnic metalwo oture Unfortunately, if the Terminator is hit too many times, he loses his legs which for some reason makes him invincible! Kyle must use all his powers of IQ to save the day

 $\overline{\mathsf{W}}$ 

# MEGADRIVE

Reese reaches Skynet's time machines. The Terminator has already left, but the controls have been left set so Reese can follow.

in search of a route through to Sarah Connor's locked room. Both the police and the Terminator cause problems here.

# COMMENT

One of my all time-favourite films finally arrives on the Megadrive. and while it looks and sounds absolutely brilliant, it sadly lacks substance. The problem is that there are only four levels to conquer, and it takes very little time to get through them all - half an hour on the easiest level is enough to see you through to the

JULIAN disappointing end screen, and even on the top difficulty setting, a even hours practice is all it takes to defeat the me! While it lasts, the game is great fun. The uphics and sound are both outstanding and nerate a superb atmosphere and the shoot 'em up action is thoroughly enjoyable, but in the end it's all over far too quickly and you're left with the distinct impression that the game should have been bigger and tougher. Only complete novices and wimps will get their money's worth here...

# MEGADRIVE

Terminator makes an excellent first

Impression, with digitised scenes

from the movie and an accurate rendition of the theme tune! The n-game graphics are spectacular, sombre, atmospheric, very detailed

and beautifully animated. The

sound is so-so, some of the effects and tunes are of a very high standard, whereas others are

# COMMENT

distinctly lacklustre. Sadly, no matter how fab the graphics look they cannot save the Terminator from mediocrity. On the top difficulty setting the first level seems pretty challenging. Unfortunately, it's downhill all the way from where Kyle picks up his gun. This makes braving the Terminator hordes stupidly easy, and the difficulty level gets no harder from this point. Completing the Terminator should take no more than a few hours, even on the top difficulty level. Once the game is completed, the fairly standard mix of platforming and blasting (mostly the latter) is unlikely to draw you back as it's pretty dull. Given more levels, a higher difficulty setting and a bit more to do in some places the Terminator could have been a classic.

GAME DIFFICULTY: VERY EASY LIVES: 1 **CONTINUES: 0** SKILL LEVELS: 4 RESPONSIVENESS: GOOD

Fab intros, loads of smart intermissions and nice in-game presentation.

Gorgeous sprites featuring some of the best Megadrive animation ever, plus fitting and

highly detailed backgrounds.

Some great tunes and effects, but there are a few crappy ones there too.

Pretty standard blasting fare. Some sections are a bit sparse and the gameplay doesn't change much.

Four short levels which take no time to complete. After that, there's nothing to hold your interest.

A potentially superb license ruined by complete lack of long-term appeal. You won't get more than a day or two's play before you're bored of it.

Right now, your Master System is your pal. somewhat different outlook on things electronic. This is because of a computer revolution engineered by Skynet, the super-whizzo defence mainframe. The ensuing war all but wiped out the human race, but one man, John Connor, turned the tide of battle and saved everyone. In the final hour, Skynet has launched a desperate bid for victory by sending a rock-hard Cyberdyne series 101 cyborg back in time to prevent John ever being born, by killing his mother. Having intercepted this information, the human forces have sent back their top soldier-type, Kyle Reese, to stop the Terminator, but will it be enough?

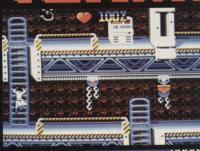

In Virgin's 8-bit version of their latest film license. you adopt the mantle of Reese in a five-level bid to save the future. Kyle runs, jumps and shoots his way through a number of different environments, keeping a constant eve out for his cyborg adversary and saving Sarah Connor from the jaws of death. In the final level. as in the film, the Terminator must be destroyed by luring it into a hydraulic press. Earth's future hangs in the balance. Can you save Sarah Connor from the twisted clutches of the Terminator?

## COMMENT

I must admit that I was a bit wary about Terminator at first following the debacle that was the Megadrive version. Imagine my surprise and delight when the Master System Terminator turned out to be a hundred times better than the 16-bit effort. Okav, so the graphics can't match up to the stunning Megadrive ones (although they are pretty good), but what really

counts is the beefed up difficulty level 1'd clocked Megadrive Terminator in the same time it took me to get off the first level of the Master System game! The levels have been redesigned and are much longer. The enemies are also more intelligent and there's always enough of them on screen to provide a constant challenge. The game design itself is hardly the most earth-shatteringly original thing to come out of a software house, and with only five levels Terminator may be a little short, but it is easily the best Master System game released in months.

Kyle starts the game with an infinite supply of hand grenades Although these possess impressive destructive capabilities, Kyle is quite slow at throwing them. There are also aim-related problems, with stair-bound combat being particularly unwieldy. Luckily for the boy Reese, his trusty assault rifle lies at the end of level one. This is a particularly powerful gun which destroys Terminators with a single burst! Unfortunately, he cannot bring this gun back through time with him, so his present-day mission is fought with a comparatively feeble Uzi 9mm.

- Kyle Reese runs around the shattered landscape of Los Angeles, 2029. It's his job to infiltrate the Skynet base and shut it down, destroying Terminators on his way.
- Kyle Reese makes his way across the rooftops of Los Angeles, 1984. Here, the objective is to reach a simple telephone box and find out Sarah Connor's address.

# SEGA

Like Rad, I found the Megadrive version of Terminator extremely easy and completed within an hour. This superior Master System title has much

more in the way of lastability. In fact, it should take quite a while just to get off the first level in this rock hard title. The high difficulty level doesn't put you off though, because the game boasts excellent playability that glues you to the console for ages. The graphics are truly excellent, with sprites and backdrops that make full use of the Master System's 8-bit abilities. Even the sound (something the Master System isn't well equipped for) is good. with atmospheric tunes and effects. Virgin Games have produced an excellent film tie-in that gamesplayers should really enjoy.

Tough and addictive gameplay makes this a veritable laugh-fest.

It's fairly tough, but there are only a few levels. Still, you'll probably find yourself playing it even when completed.

A top-notch platform shoot 'em up which is slightly spoiled by being just a mite too short.

very four years the world's finest athletes come together to compete in the Olympic games. On this great occasion they have the opportunity to realise their dreams and return home in triumphant possession of a gold medal. Now you too can realise those dreams, but with this latest sports game you don't have to do any early morning training - all the action happens on-screen.

US Gold's Olympic Gold contains the whole spectacle, from the lighting of the torch to the medal presentations. There's the chance to become the new kid off the blocks in the sprint, be untouchable in the hammer and win Bully's special prize in archery. Four other gold medals can be won in the hurdles, the pole-vault, diving and swimming. Olympic competition can be tough so national or club standard is best for rookie athletes. Beginners can also learn perfect technique from the teaching facility which takes the player, step by step, through the necessary moves of the various disciplines. As talents flower, the challenge is not only to beat the opposition and claim the gold, but to break the Olympic and world records, thus ensuring a place in athletic history!

The traditional opening event of the games, swimming works in exactly the same way as sprinting. In both events the player races five opponents in a heat and five in the final, providing he gets that far

Like the diving event, pole-vaulting requires a lot of practice in order to tackle the greater heights. Good speed on the runway and precise judgment with the pole are

hammer and edge towards the front of the circle. When optimum speed and strength are attained as indicated in the top right hand corner, it's time to let go!

# ROBIN HOOD, ROBIN HOOD...

The whole process of drawing the bow, aiming and firing has to be done quickly. If the archer spends too long aiming while the bow is tensed it becomes harder to hit the target.

It's time to impress the judges with some inverted pike twists and all that caper. Developing perfect dives involves mastering some complicated key-pad manoeuvres. Pulling off the hardest dives ensures the greatest rewards.

With Olympic hype starting to grow, the timing of this release is just about spot on. Add to this my anthusiasm for athletics and you'd hink Olympic Gold couldn't fail to hink Olympic Gold couldn't fail to hink Olympic But I found nothing particularly appealing about this game. There's a wide veriety of

Fremember Track and Field in the arcades and it seems like things just haven't ved on. It's a pily that innovations in other ports games haven't rubbed off on Olympic Gold At it stands, it's a merely adequate game that onlust just about justifies its price tag.

Olympic endorsements litter the title screen. Difficulty levels and the teach facility are useful touches.

The animation of the sprites isn't bad, but

the backdrops are uninventive and bland.

Irritating, weedy tunes and the sound effects

are largely non-existent.

The teach mode and largely simplistic nature

of the game makes this a breeze to get into.

...but while the desire to break records might keep you plugging away for a while, there's simply not enough depth to sustain interest for a long period.

A largely disappointing game with nothing particularly new or exciting on offer. Only ardent sports fans will be interested.

Lever lancied using some 'real life' artillery with your Super NES games? Ever felt like scoping out that final enemy boss with a 'real' gun and blasting him away by pulling a 'real' trigger? Well, all of your dreams have come true with the release of the Nintendo Super Scope - a good-looking piece of kit rather akin to a mini-bazzoóka.

At the moment there is only game available for the Super Scope, and that's the cartridge that comes "free" with the £79.99 package. There are three different mini-games packed into the one game cartridge, all of which are detailed in this MEAN MACHINFS: review.

actually found the Super Scope tiself to be quite an impressive piece of hardware which worked surprisingly well. Most Light Phasers I've used in the past were at all unresponsive and inaccurate not so the Super Scope. I did find that after prolonged use, I suffered from a very numb shoulder. The game cartridge supplied shows the potential of the Scope very well.

RICH acan of the Scope very well scan to the games are well-presented and easy to get into, but I did fin hat all of them grew quite boring after a short space of time, especially the three-game Laser lazer (which is just one game with different graphics for each section). A young fellah-me-lad adjusts his sights with the Scope. Make sure your aim is true.

Mole Patrol is a variant on the mole-bashing coin-ops seen in arcades across the globe. In those games you had to mercilessly club to death moles that sprung out of holes. This game is much the same, except this time you scope them out with your photon firearm and then let rip. Just like Blastris, the game gets faster after a while until it reaches almost manic levels!

The moles line up for inspection.

Each game is presented quite well, but there is a lack of ontions.

Although there isn't much variety in the

graphics of each game, they are very appealing.

Some good blasting effects and tunes spice up the atmosphere.

The Super Scope is responsive and accurate, making for some decent blasting action...

...but the six games supplied in the cartridge grow dull very quickly, and as yet there are no other Super Scope compatible carts.

A potentially excellent light oun that desperately needs a range of decent games to make it a worthwhile purchase.

one of those games that looks great on paper, isn't actually a great deal of fun to play. The lack

of challenge on the early levels makes things

IAN initially rather dull, and the uninteresting screen layout and rather

repetitive nature of the action means that by the time any sort of challenge arises late in the game, you're already pretty bored of it. Totally Rad could have been just that, but it's not and I can't really recommend it to anyone other than platform beginners with a low boredom

# COMMENT

For the first couple of plays Totally Rad is a shambling mockery of a parodic travesty (Like your English Jaz). Although the graphics aren't bad and the amination is picely skill, the gameplay has all been done before, and been done better in many cases. The magic also makes the first few levels

RAD

idiculously easy. All you need to
do is select flight and scoot over
all dangers! Stupid, really. Still,
once you get past the first two or three levels, the

game picks up a bit. The number of powers add a fair bit of strategy to the proceedings, although once you know which magic to use where, things get a bit simplistic again. Totally Rad certainly has some good ideas, but it's just too simplistic in its implementation. Given a lot more challenge and a little more thought it could have been great, but as it stands, it's just a reasonable quality game only really of interest to anyone who's Totally Bored of standard platform games.

# SUPER RACE TRACKS here are sixteen different tracks in the Megadrive

There are sixteen different tracks in the Megadrive version of Super Oil-Road, equalling the Super NES version and actually bettering the arcade version! Each is packed with hazards to slow you up, including mud pools, steep climbs, walls and horrlic harping furns! Luckly, some tracks have cunning short cuts that you can use to your advantage against the

Ballistic should be applauded for releasing a game of this calibre as part of their £29.99 price range. RICH (actually, I've a feeling that they're in the Off-Road Challenge

follow-up). The sound effects and music are very dull though and they don't make any use of the Megadrive's sample-playing abilities. However, I can see single players getting a bit bored with this after a while as there isn't much in the way of variety, but if you've got a pal who fancies some two-player racing, get this!

the features of the arcade game and adding some extra features of its own, this conversion provides loads of two-player thrills and spills.

The graphics are LIAN excellent, with the tiny cars bombing around nicely drawn tracks, but sadly the sound isn't so hot, with rather weak tunes and effects. What's most important is the playability, and Super Off-Road is very strong in this department, especially in two-player mode where the competitive edge of the proceedings really comes into its own. In one-player mode the game is still fun, but I found after a while it became a bit repetitive - beating the computer opponents is fun, but nothing like playing against another human. If you're after racing fun, this is well worth taking a look

at, especially if you've often got

a second player at hand to join in the action.

# SELECT OF PLAYERS NUMBER

uro Club Soccer from Virgin is based on their home computer footy sim Manchester United Europe, but with a whole host of updated options. It adopts a horizontally scrolling grandstand-view style of play with the ball sticking to the players' feet as opposed to being a free-rolling spheroid.

The object of the game is to pick your favourite team from the one hundred and seventy on offer and take them all the way to the finals of the European Cup championship by trouncing fifteen other randomly-selected computer teams. Up to seven tournaments in which up to nine players may participate can be saved on a battery back-up to make the lengthy campaign more palatable.

gamepsky sin to it was a several sloppy points which mar the action, namely the poor collision detection, low player intelligence and very awkward controls which make putting logether passing moves very tricky and frustrating. Only friendly matches are played in Arcade mode - for European Cup joger-pokery, Simulation mode is the one to choose. As you may sexpect, things are at little more realistic, with a slower play speed and plenty of rule violation-related horsepalay.

version promised to make any number of improvements. Sally, for the poor state of Megadrive lootie titles, European club is in fact worse than its ST predecessor! The graphics aren't all that bad, with some small but coloruful, detailed and fairly well fine intermission screen to gaze a. Sadly, there are a number of gameplay upsets which spoil things. Firstly, the collision detection is very poor, which puts the dampers on activities such as tackling, passing, chedding and centrally movine. tackling, passing, shooting and generally moving the ball about. Secondly, the players seem to have all the footballing abilities of the Baboon All-Stars second XI, with their passes and goal attempts being particularly feeble, not to mention those frustrating huge slides which masquerade as tackles. This combined with the coma-inducing slow pace produces a piece of software as sappointing as they come.

A superbly presented soccer game which is sadly let down by some awkward gameplay points.

## HALF-BAKED

At half-time the commentator pops up in the company of David Robinson. Together, they are about as expressive as Ray Wilkins and their observations have an uncanny knack of stating the obvious. During this entertaining interlude however. you are given the opportunity to check on your team stats and those of the opposition.

Here's a decent run-up to the opposition's basket.

rder! Order! The Supreme Court is now in session and ten men stand in the dock accused of sweating profusely. Their defence? Well, they're basketball players and are in fact perfectly entitled to perspire on the particular court in question Get the rack out and stretch those legs because

Supreme Court basketball enters the fast, skillful and often frantic world of... well, basketball! There are four teams to choose, each with their fair share of good and bad points. One team might be strong in defence, another might be sharp on the break, but generally they're all evenly matched. Good player selection is essential if opponent's weaknesses are to be exploited, and players too have their good and bad

After the jump off it's a matter of effective dribbling, quick passes and accurate shooting on the offence, and determined marking, blocking and stealing on the defence. If a player can get close enough to the basket, a dunk will make sure of two points, but on more desperate occasions the risky three pointer might prove necessary. At the end of the day a can of stay-dry deodorant is recommended!

The Apaches get a free throw.

## **CUT THE ACTION!**

Supreme Court basketball uses a cut screen. When the ball crosses the halfway line the angle of vision changes to include more of the court action. This takes a bit of getting used to, since the cut is virtually instantaneous, but once you've played the game a few times the switch becomes second

a number of different and the two handed slam to the leap hook dunk. But whatever the

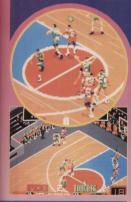

The Tomcats have the ball and the Apaches are supplying no opposition!

This mean, strutting basketball type introduces the game.

## SCUMBAGS!

opponent who is attempting to shoot, a free-frow is given. Basically all of the normal rules relating to fouls, charging and travelling apply. Looking through the player's stats reveals the notificusty based foulers. The problem is that some of them are brilliant shots or great dribbliers, so weighing up the pros and cons is important.

At the start I found the cut-view irritating to say the least. Every time a player crosses the halfway line with the ball I had to change his direction to

compensate for the change in angle. Another gripe of mine is that Supreme Court basketball fails to capture the razzamataz of the game, in the way that Super Real Raskethall did. The action is viewed from too far away which means the excitement of dunking is lost. It's a shame because the animation and graphics are excellent, and the sound is spot on, right down to the basketball boots squeaking on the court surface. While the balance between the teams makes the games competitive, I'd have preferred more teams of varying quality so that when you get really good you can try to beat the best sides with the worst, Supreme Court Basketball is good, but if you want the best, get Super Real Basketball or wait for the forthcoming Bulls Vs Lakers

### COMMENT

Supreme Court Basketball certainly scores highly for innovation, departing from the usual diagonally scripting view of other Megadrive basketball games. The halfway line screen switch is irritating at first, but once you get used to this the viewpoint works well, and this is complemented by some stunning animation and great effects. The only real

RAD problems with Supreme Court are the poorly worked defensive strategies - It's just a little too tricky to perform pinpoint blocking and stateling. Also the lack of room for a running game is a source of irritation. The only factic that is really effective is the long-ball pass, which takes some of the excitement out of the game. Supreme Court Baskeball is a very good game, It's just a shame that there wasn't a little more thought put into the tactical aide of things.

### **PRESENTATION 89%**

There are plenty of options and some nice touches like the half-time chit-chat.

GRAPHICS

The animation is excellent, the basketball court is well drawn, and option screens are graphically superb.

SOUND

Very impressive sound effects which create the perfect aural atmosphere. The intro music captures the sports theme perfectly.

PLAYABILITY 79%

Because of the cut screen, play is awkward and the constant ping-pong between angles spoils the excitement.

ASTABILITY 76°

The gameplay flaws mean that anyone other than a basketball freak might get fed up.

## DVERALL 78%

Definitely a could-have-been kind of game. It's got excellent graphics and sound, but loses out somewhat in the all-important playability stakes.

Another of the practise rounds in the game is a third person perspective effort that sees your player attempting to score baskets from outside of the basket area (a three-pointer, as it's known). The A button collects the ball, the B button springs you into the air, while a stab on the C button releases the ball and sends it off to the basket. ### COMMENT

his is actually a onversion of a crappy, very limited and boring eight year old C64 computer game called One-on-One

Baskethall, And even though EA IAN have added a few extra elements and attempted to beef it up, at the end of the day it's still the same old crappy, very limited and boring game. The sound is pretty good, but the animation on the players is appalling (both players run around as though they've got 15 pounds of cack in their trousers) and the gameplay is virtually devoid of excitement even with two players - due to the frustratingly hopeless control method. The slam dunk competition is laughably easy

and really there's little else to keep you playing. If you're a basketball fan either go for Supreme Court Basketball or wait for the forthcoming Bulls Vs Lakers. Both are infinitely better than this tosh

### COMMENT

I thought Electronic Arts could do no wrong and was really looking forward to Jordan Vs Bird.

Unfortunately, something has gone drastically wrong. The main part of the game, the one-on-one section is completely devoid of excitement and boasts severely deformed characters with laughably disabled animation. Also, actually scoring a basket seems to be more of a matter of luck than real skill -

specially the three-pointers. The Slam Dunk Event is more of a non-event. Running up to the basket and performing manoeuvres is incredibly easy and involves little use of skill. The same can be said for the graphically pleasing Three Point Contest. I scored full marks from all positions on my second attempt! Considering that EA are responsible for the likes of the amazing John Madden '92 and EA Hockey, frankly I'm surprised that they released this sub-standard piece of software, Hopefully, the forthcoming Bull Vs Lakers will see a return to the usual high standard we expect from Electronic Arts.

and a great instant replay option.

These range from being superb on the three-point screen, to being rather sad on

the main one-on-one section

Some good effects and great music courtesy of Rob Hubbard

All three sections are either completely devoid of thrills or are laughably simple to complete.

The lack of variety or longevity on each of the sections make this grow dull extremely quickly.

A substandard sports simulation that won't even appeal to baskethall fans Check out Supreme Court Basketball or wait for Bulls Vs Lakers.

SKYLARKING

This is the main part of the game

Here, you are thrust head-first into

trying to score more baskets than

throws are available for use... if

you can master them, of course!

Due to deadlines, allow up to six weeks for your advert to appear in the magazine.

# RODLAND

Ever fancied prancing around a platform environment, whacking meanies around with your magic wand? Yes? Perhaps you should check out The Sales

Curve's Rodland game, out in the Autumn of this year. In this conversion of the Jaleco coin-op, it's your job rid each single screen of alien intestation by whipping out your wand and slapping those xenomorphs into oblivion. Each vanquished meanie turns into a special weapon which can be used against the remainder of

the alien contingent.

Rodland looks like being a superb coin-op conversion with some excellent graphical effects and groovy simultaneous two-player action. We'll be reviewing this in a few month's time, so look out for that future

edition of MEAN MACHINES.

Use your highly useful wand to slap some of your enemies around. Those doorways are used to warp to other parts of the screen (as indicated by those flashing stars between the two doorways).

Owww! The hero of Rodland is viciously cuffed by one of the many meanies. Those flowers in the background are bonuses.

appear on a Megadrive near you soon, courtesy of the Flying Edge (a subsidiary company of Acclaim). The basic idea of the game is that you're a contestant in the game show of the future, where the idea is to blast everything in the Smash TV studio - before they kill you! Luckily, you're equipped with a decent blaster

kil you't Luckily, you're ouipped with a decent plaste and there are plenty of other weapons like greendeds and rocket launchers lying around. Making use of these to blow up the legions of enemy syntes and the victous end of-level bosses is essential. Just like the coin-op, Smash TV bosses simultaneous two-player arcacet actions so you can choose to act as a team or just look out for yourself and pinch the many prizes that litter the Banshi TV studio.

that filter the Small I V studio. We've had a sneak preview of the Megadrive version of the game but we will reserve judgement until we get round to writing the full review. Watch out for a future issue of MEAN MACHINES.

## SU

Super SWIV is a conversion of the ace Amiga classic that put you in charge of either a jeep or a helicopter, and charges you with the task of blowing up an entire defence budget's worth of military hardware.

All of this explosive action is carried out on a vertically scrolling playing area, with all manner of power-ups available to boost the already formidable destructive potential of your vehicle. Just like the Amiga version, simultaneous two-player blasting is the order of the day. However, each vehicle has its own strengths and weaknesses. For example, the jeep shoots in eight directions as opposed to the helicopter's one. However, the helicopter flies over obstacles on the ground where the ieep has more problems. We've had a glimpse at an extremely early version of the game and can report that the game is shaping up really nicely. Don't hold your breath for this one though as the game isn't going to be released until early 1993!

## NEW GAME PREVIEW

Based on the gory Namco coin-op, Megadrive Splatterhouse II is a horrific horizontally scrolling beat 'em up in the style of Double Dragon. The player lakes control of a masked marauder (who

The player takes control of a masked marauder (who bears a striking resemblance to Jason from the Friday the 13th movies), out to rescue his girlfriend from a gruesome flend. Unfortunately, to get to this evil villain, our hero must run the gauntlet of the

Splatterhouse, slapping about any undead meanies that cross his path. Helping the hardy hero in his quest are a number of pick-up weapons, including shotguns and wooden poles (you can splat enemies against the wall with these!).

Jaz 'n' Rich have been treated to a sneak preview of Splatterhouse II at the offices of Sega Europe and came away very impressed. You'll be able to sample the sinister delights of Splatterhouse II when it's released this Summer.

▲ The hero of the game comes up against an end-of-level boss. This particular meanie crops up at the end of stage two.
